PROFESSIONAL SUMMARY

MCA graduate (2026) and former DevOps Intern at Rooman Technologies with proven, hands-on experience architecting cloud-native infrastructure, containerized CI/CD pipelines, and AI-powered software solutions. Combines deep expertise across the full engineering stack from Terraform-provisioned AWS environments and K3s Kubernetes clusters to MERN-stack dashboards and Scikit-learn ML models. Holds Outstanding-grade virtual internship certifications from both Google and AWS, reinforcing a consistent record of elite-level technical upskilling.

TECHNICAL SKILLS

DevOps & Infrastructure: Docker, Docker Compose, Kubernetes (K3s), Terraform (IaC), Ansible, ArgoCD (GitOps)

CI/CD & Cloud: GitHub Actions, Trivy (Security Scanning), AWS EC2, IAM, Route53, AWS CLI, Nginx

Programming & ML: Python, JavaScript (ES6+), TypeScript, Java, C, C#, R | Scikit-learn, Pandas, NLP

Web Development: MERN Stack (MongoDB, Express.js, React.js, Node.js), Vite, PHP, HTML5, CSS3

Databases & Tools: MongoDB, MySQL, SQL, Git, Linux CLI

PROFESSIONAL EXPERIENCE

DevOps Intern — Rooman Technologies Ltd.

February 2026 – May 2026

- Orchestrated repeatable cloud infrastructure provisioning using Terraform IaC, eliminating configuration drift and enabling version-controlled, audit-ready environment deployments at scale.
- Containerized complex microservice architectures with Docker and Docker Compose multi-stage builds, achieving strict development-to-production environment parity and reducing deployment defects.
- Spearheaded the adoption of a GitOps delivery model using ArgoCD, enabling Kubernetes workloads to self-heal and auto-synchronize against live version-controlled manifests with zero manual intervention.
- Automated server configuration and multi-node provisioning workflows with Ansible playbooks, significantly cutting repetitive infrastructure setup time across staging and production environments.

Full-Stack Development Intern — Encode Data Tech

2 Months

- Engineered responsive React front-end components and Node.js/Express RESTful back-end services, delivering full-stack feature modules within Agile sprint cycles.
- Implemented version-controlled collaborative workflows using Git branching strategies and code review processes inside a cross-functional engineering team.

PROJECTS

MERN GitOps CI/CD Pipeline — TypeScript · Docker · GitHub Actions · AWS EC2 · K3s · ArgoCD

- Developed a production-grade TypeScript MERN dashboard enforcing strict end-to-end type safety, eliminating entire classes of runtime errors at the interface boundary.
- Containerized frontend (Nginx reverse proxy) and backend services using isolated multi-stage Dockerfiles, orchestrated via Docker Compose for reproducible, environment-agnostic deployments.
- Implemented a GitHub Actions CI pipeline with automated Trivy container vulnerability scanning on every code push, embedding security gates directly into the development lifecycle.
- Provisioned AWS EC2 instances running K3s Kubernetes clusters, deploying ArgoCD GitOps controllers for declarative self-healing configuration management against live Git repositories.

Mental Health Monitor & Stress Detector — React-TS · Vite · Python · REST API

- Engineered a React/TypeScript + Vite frontend that collects and evaluates multi-parameter user input to surface mental health and stress indicators through an accessible, responsive UI.
- Built a Python backend ML service that processes analysis requests and delivers dynamic inference results via custom REST APIs, enabling seamless full-stack integration.

AI-Powered Study Assistant — Python · NLP · Scikit-learn

- Architected an NLP-driven desktop application that ingests textbook content and auto-generates concise study summaries and practice quizzes, reducing manual revision effort.
- Authored a formal Software Requirements Specification (SRS) covering text preprocessing pipelines, automated summarization logic, and user intent parsing modules.

Intelligent Payroll Management System — Python · Scikit-learn · Pandas · SQL — MCA Mini-Project

- Co-developed an automated payroll database system integrating Scikit-learn regression models for salary forecasting and Pandas-based anomaly detection to flag data profiling irregularities.

Online Grocery Store — E-Commerce Platform — *HTML5 · CSS3 · JavaScript · PHP · MySQL* — *BCA Final Year Project*

- Delivered a full-featured e-commerce application with user authentication, role-based access, dynamic product catalog, and a secure MySQL-backed transactional checkout system.

EDUCATION

Master of Computer Applications (MCA) <i>Srinivas Institute of Technology (SIT), Mangalore</i>	<i>Graduated 2026</i>
Bachelor of Computer Applications (BCA) <i>Sharada Degree College, Mangalore CGPA: 8.2</i>	<i>Graduated 2024</i>
Pre-University Course — Science <i>Parignana PU College</i>	<i>Graduated 2021</i>

CERTIFICATIONS & TRAINING

- **HTML5 Application Development** • *Ethnotech Academic Solutions @ SIT, Mangalore* • Jan–Feb 2025
40 Hours Training Program • Cert Code: ETHSIT010267
- **AI-ML Virtual Internship** • *AWS Academy & AICTE EduSkills* • March 2025 • Grade: **O**
- **Research Methodologies & IPR — Elite GOLD** • *VTU Centre for Online Education* • April 2025
- **AI-ML Virtual Internship** • *Google for Developers & AICTE EduSkills* • June 2025 • Grade: **O**
- **Advanced Python Programming** • *Ethnotech Academy (Skill India / NSDC)* • July 2025 • Grade: **A**
Certificate ID: CERT_3043652
- **Data Analytics Training** • *Mphasis Advanced IT Skill Training* • — • Grade: **A**
- **Machine Learning with Python (ML0101EN)** • *IBM Developer Skills Network via Etrain Education* • March 27, 2026
- **DevOps Internship Completion Certificate** • *Rooman Technologies Ltd., Bengaluru* • May 2026
Remote Internship • Score: 100 / 100 • Signed by Rakshit Shetty, Director
- **Cloud Computing — Elite GOLD** • *VTU Centre for Online Education* • July 15, 2026
3 Credits • Visvesvaraya Technological University, Belagavi • USN: 4SN24MC005
